

Squash GVS 48113 F₁ Hybrid

- Description:** Plant is mid-size, upright bush with cut leaves having distinct silver markings. Fruits are cylindrical in shape a longer version of the Lebanese Vegetable Marrow type hybrid. Yields are high and very concentrated.
- Disease:
Tolerance** WMV, ZYMV, PMR, DMR.
- Picking:** Approximately 45 days to maturity -- long picking periods.
- Comments:** GVS 48113 VR is similar in shape to Topkapi, Iskandarani, and Queen with coloring similar to Anita/Clarita. It is good for both tunnel and open field production. It is suitable for markets in the Mediterranean and Middle East areas.
