

Lettuce Red Sails

- Origin:** Red Sails-Breeder and original vendor: Seminis Vegetable Seeds-Petoseed. Characteristics: 45 days to maturity, fast growing, heat-tolerant and slow to bolt, open heads up to a foot across, deepens in color as they mature, bronze-red leaves, holds color and sweetness in hot weather. 1986.
- Description:** The plant is large and upright. The leaves are deeply crumpled and lobed with cut waved margins. It's a red salad bowl type. Coloration is bright bronze red and light green.
- Maturity:** Approximately 45-50 days
- Comments:** It is suitable for Fresh Market, Home Gardens, and Shipping. It is often used as a salad garnish due to its sweetness.
