

Melon GVS 31025 F1 Hybrid Yellow Canary Type

- Description:** This variety has a pear shape, and has a smooth exterior, with minor corrugation. Exterior coloring is a brilliant canary yellow, while the interior is light green, to light orange near the cavity. It is thick, sweet, and very firm. Average size is 7.5 inches by 6.5 inches. Average weight of the melon is 5.5 to 6 pounds.
- Maturity:** Approximately 92 days
- Disease Tolerance:** Powdery Mildew, Fusarium wilt races 1 and 2.
- Comments:** This variety has a vigorous vine, and green leaves. This variety is an excellent shipper. This is an improved, early, version of Yellow Canary, adding disease tolerances and improving yields, and size.
