# Tomato

## 223 F<sub>1</sub> Hybrid

### Description

Plant is determinate, compact, medium to medium large size with good cover. Fruit is round shaped, very firm, uniform and concentrated. Fruit turns deep red at maturity and maintains its hardness. Fruit size is 150 grams on average.

### Maturity

Mid-season

### Disease Tolerance

Verticillium wilt, Fusarium wilt race 1 and 2, Alternaria stem canker, Root knot nematodes.

### Comments

223 F<sub>1</sub> is a multipurpose tomato for open field planting (processing and fresh market; hand-picked or machine harvest). It can be successfully grown for a wide variety of uses and in a wide range of climates. It is an excellent long-distance shipper.

# Tomato

## 277 F<sub>1</sub> Hybrid

### Description

Plant is determinate, compact, medium to medium large size with good cover. Fruit is round shaped, very firm, uniform and concentrated. Fruit turns deep red at maturity and maintains its hardness. Fruit size is 150 grams on average.

### Maturity

Mid-season

### Disease Tolerance

Verticillium wilt, Fusarium wilt race 1 and 2, Alternaria stem canker, Root knot nematodes.

### Comments

277 F<sub>1</sub> is a multipurpose tomato for open field planting (processing and fresh market; hand-picked or machine harvest). It can be successfully grown for a wide variety of uses and in a wide range of climates. It is an excellent long-distance shipper.

# Tomato

## 944 F<sub>1</sub> Hybrid

### Description

The plants are determinate, medium size with excellent foliage cover. The fruits are deep globe shape, light green shoulder color, medium to medium large size (170-200 grams), and very firm.

### Maturity

Mid-season

### Disease Tolerance

Verticillium wilt race 1, Fusarium wilt race 1 and 2, Alternaria stem canker, Tobacco mosaic virus, Root knot nematodes and Stemphylium.

### Comments

This tomato is a extended shelf life variety.

# Tomato

## Aswan F<sub>1</sub> Hybrid

### Description

The plants are determinate, medium size with excellent foliage cover. The fruits are deep globe shape, light green shoulder color, medium to medium large size (170-200 grams), and very firm.

### Maturity

Mid-season

### Disease Tolerance

Verticillium wilt race 1, Fusarium wilt race 1 and 2, Alternaria stem canker, Root knot nematodes and Stemphylium.

### Comments

Aswan is an extended shelf life variety tomato with a wide range of disease tolerances.

# Tomato

## Big Strike F<sub>1</sub> Hybrid

### Description

Plant is determinate, compact, medium to medium large size with good cover. Fruit is deep globe shaped, light green shoulder, good color, large size and very firm.

### Maturity

Mid-season

### Disease Tolerance

Verticillium wilt, Fusarium wilt race 1 and 2,  
Nematode

### Comments

Big Strike is a good dual-purpose variety (processing and fresh market; hand-picked or machine harvest). Adapted to semi-arid climatic growing conditions. Fruit is large. With additional nitrogen, water and wide spacing it can be used as a market variety in certain areas of the world.

# Tomato

## Faridah F<sub>1</sub> Hybrid

### Description

Plant is determinate, compact, medium to medium large size with good cover. Fruit is round shaped, very firm, uniform and concentrated. Fruit turns deep red at maturity and maintains its hardness. Fruit size is 150 grams on average.

### Maturity

Mid-season

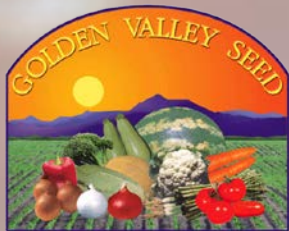

### Disease Tolerance

Verticillium wilt, Fusarium wilt race 1 and 2, Alternaria Stem Canker, Nematode

### Comments

Faridah is a multipurpose tomato for open field planting (processing and fresh market; hand-picked or machine harvest). It can be successfully grown for a wide variety of uses and in a wide range of climates. It is an excellent long-distance shipper.

# Tomato

## Haifa F<sub>1</sub> Hybrid

### Description

The plants are determinate, and medium in size. The fruit has a square round shape, has a uniform green shoulder, averages 150 grams in size, and is very firm.

### Maturity

Very Early

### Disease Tolerance

Verticillium wilt, Fusarium wilt race 1 and 2, Alternaria stem canker, Root knot nematode, Stemphylium

### Comments

Haifa is a variety with multiple uses. It is suitable for most markets and has a high number of disease tolerances.

# Tomato

## Maisara F<sub>1</sub> Hybrid

### Description

The plants are determinate, and small in size. The fruit has a round shape, has a uniform green shoulder, averages 95 grams in size, and is firm.

### Maturity

Early

### Disease Tolerance

Verticillium wilt, Fusarium wilt race 1 and 2, Alternaria stem canker, Root knot nematodes and Stemphylium.

### Comments

Maisara is a good variety for producing paste, juice, and several other products. It is suitable for most markets and has a high number of disease tolerances.

# Tomato

## Remus F<sub>1</sub> Hybrid

### Description

Plant is determinate, medium large size with good cover. Fruit is square-round shaped, uniform shoulder color, firm and very smooth. Fruit size is 110 grams on average.

### Maturity

Medium Early

### Disease Tolerance

Verticillium wilt, Fusarium wilt race 1 and 2, Alternaria stem canker, Stemphylium, Root knot nematodes.

### Comments

Remus is a good dual purpose tomato.

# Tomato

## Romeolus F<sub>1</sub> Hybrid

### Description

Plant is indeterminate, medium size with good cover. Fruit is square-round shaped, uniform shoulder color, firm and very smooth. Fruit size is 95 grams on average.

### Maturity

Medium Early

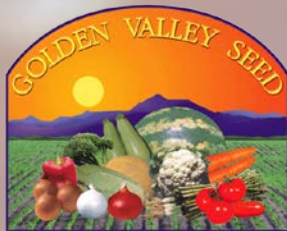

### Disease Tolerance

Verticillium wilt, Fusarium wilt race 1 and 2, Alternaria stem canker, Stemphylium, Root knot nematodes.

### Comments

Romeolus is good for fresh market.

# Tomato

## Sawan F<sub>1</sub> Hybrid

### Description

Plant is determinate, compact, medium to medium large size with good cover. Fruit is round globe shaped, no blossom end, shiny bright red color, very uniform, very firm and high yielding. Fruit size is 150-160 grams.

### Maturity

Mid-season

### Disease Tolerance

Verticillium wilt, Fusarium wilt race 1 and 2, Alternaria stem canker, Nematode

### Comments

Sawan is one of the best outdoor, dual-purpose tomatoes ever bred (processing and fresh market; hand-picked or machine harvest). It can be successfully grown for a wide variety of uses and in a wide range of climates. It is an excellent long-distance shipper.

# Tomato

## Wafa F<sub>1</sub> Hybrid

### Description

Plant is determinate, compact, medium to medium large size with good cover. Fruit is round shaped, very firm, uniform and concentrated. Fruit turns deep red at maturity and maintains hardness. Fruit size is 150 grams on average.

### Maturity

Mid-season

### Disease Tolerance

Verticillium wilt, Fusarium wilt race 1 and 2, Alternaria stem canker, Nematode

### Comments

Wafa is a multipurpose tomato for open field planting (processing and fresh market; hand-picked or machine harvest). It can be successfully grown for a wide variety of uses and in a wide range of climates. It is an excellent long-distance shipper.
