

Watermelon GVS 53083 F1 Hybrid

Description: The vine is large, and has vigorous seedling growth and durability. The fruit is oblong, approximately 17 in. by 9 in., and weighing 20 to 30 pounds. The exterior is distinctive in its light and dark green striping. Interior color is a brilliant red, with large, brown seeds. The flesh is firm and sweet.

Maturity: Approximately 92 days

Disease Tolerance: Fusarium race 1, Anthracnose race 1 and 3.

Comments: This variety has excellent long distance shipping qualities.
